Summary

Business-aligned engineering leader with 10+ years building scalable products in FinTech and B2B SaaS. Leads high-performing teams through cross-functional delivery, coaching engineers into greater scope and impact. Brings deep experience in serverless architecture, developer experience, and technology commercialization (MBA, Georgia Tech; BS C.S., Georgia Southern).

Work Experience

YouLend

Mar. 2025 - Feb. 2026

Lead Engineer

Tech Stack: Angular, TypeScript, Asp.Net, C#, MongoDB, PostgreSQL, Kubernetes, and AWS.

- Established YouLend's first US-based engineering team.
- Supported US business operations via hands-on feature development, maintenance, and support.

Branch Politics

Dec. 2024 - Mar. 2025

CTO

Tech Stack: NextJS, React, Express.js, Feathers.js, TypeScript, Node.js, OpenAI, MongoDB, Serverless Stack, Heroku, and AWS.

- Automated political candidate research process by replacing local scripts with event-driven serverless architecture.
- Increased service reliability by introducing ephemeral environments for end-to-end testing in temporarily provisioned environments.
- Optimized cloud compute costs by migrating applications from Heroku to AWS and archiving unused resources.

DemoFox

Mar. 2023 - Sep. 2024

Founder & CEO

Atlanta, Georgia

Tech Stack: Angular, Tailwind CSS, NestJS, TypeScript, Node.js, PostgreSQL, OpenAI, Serverless Framework, and AWS.

- Founded DemoFox, an AI-powered enterprise social video collaboration startup.

UserTesting

Aug. 2021 - Feb. 2023

Director of Engineering

Chamblee, Georgia

Tech Stack: Angular, TypeScript, Ruby on Rails, GraphQL, MySQL, Cloudformation, and AWS.

- Led 3-team, 15-person Test Results engineering organization.
- Directly managed and mentored engineering managers and staff engineers through the architecture proposal process for new features such as full-text search.
- Empowered future architecture flexibility by adding core domain model lifecycle events to application event bus.

UserTesting (continued)

Jul. 2019 - Aug. 2021

Senior Manager, Engineering

Chamblee, Georgia

- Accelerated customer time-to-value with Keyword Maps, a novel aggregate transcript visualization.

- Guided engineers' career growth, mentoring them into senior, staff, principal, and engineering manager roles through tailored development plans and coaching.
- Revitalized department-wide legacy AngularJS upgrade by introducing custom monorepo tooling.
- Improved design system release velocity with Cypress visual baseline integration testing.

Kabbage

Apr. 2018 - Mar. 2019

Software Development Manager

Atlanta, Georgia

Tech Stack: Angular, TypeScript, Asp.Net, C#, SQL Server, Elastic Beanstalk, and AWS.

- Managed two teams of software and QA engineers responsible for the marketing website and signup funnel.
- Drafted performance improvement and career development plans.
- Coached team members through individualized plans and tracked improvement.

Kabbage (continued)

Jan. 2015 - Apr. 2018

Senior Software Engineer

Atlanta, Georgia

Tech Stack: AngularJS, JavaScript, Django, Python, SQL Server, Elastic Beanstalk, and AWS.

- Directly increased same-day cash advance volume through redesigned signup flow.
- Architected core product transition from multi-tenant ASP.NET to single-tenant Single Page Applications back by multi-tenant microservices.

Octane5 International

Apr. 2014 - Dec. 2014

Django Developer

Alpharetta, Georgia

Tech Stack: JavaScript, Django, Python, and PostgreSQL.

- Developed and maintained BrandComply, a specialized brand license management CMS platform

Veloxiti, Inc

Jul. 2013 - Apr. 2014

Engineer

Alpharetta, Georgia

Tech Stack: Play Framework and Java.

- Developed systems for the US Army Civil Information Management program with the US Army Research Laboratory.

Education

Georgia Institute of Technology

2020 - 2023

Master of Business Administration

Atlanta, Georgia

Concentration: Technology Commercialization (TI:GER)

Georgia Southern University

2010 - 2013

Bachelor of Science, Computer Science

Statesboro, Georgia

Side Projects

The Cosplay Herald

Aug. 2025 - Sep. 2025

Tech stack: NextJS, React, Tailwind CSS, Sanity CMS, and Vercel.

- Designed, developed, and launched *The Cosplay Herald*, a niche news platform for the competitive cosplay community.
